# PROJECTS

Brain Exchange – Full Stack Developer, QA

March 2024- present

I am working to build a full stack web app for the Brain Exchange. The platform enables direct exchanges of expertise and services between specialists and users, resembling a "brain exchange." Users can book services, ranging from consultations to hands-on assistance, via a dynamic Angular frontend. Backend API developed in Node.js and Express.js, with MSSQL for data storage. Extensively tested using Jest, Cypress, and Jasmine.

Mogrec Ventures Website – Lead Developer, QE/QA

February 2024- March 2024

Worked in a group of two in building Mogrec Ventures Website, a tours and travel website. Mogrec features all functionalities to showcase upcoming tours, show reviews about past tours and allow customers to book tours through the website. We built its frontend in Angular, backend in Node.js, and database in MSSQL.

Shopit Ecommerce App – Frontend Developer

January 2024 –February 2024

Collaborated in a group of 3 developers in building an eCommerce web app for a project. Built the frontend UI in Angular.
